Our Townus series - timeless elegant

For music and movies

Perfectly matched to the appearance, acoustics and technology of the Townus models is our new Townus Sub 12 active subwoofer, which offers enormous bass response and maximum bass dynamics. Thanks to its elegant cabinet, this bass behemoth can be harmoniously integrated into a wide variety of living spaces. The active front-firing subwoofer shines with its high power amplifier output, which, in combination with the 308 mm titanium subwoofer chassis and the equally large down-firing passive cone, enables excellent bass performance. Its high-quality, comprehensive features and elegant exterior also make the Townus Sub 12 attractive for other speaker series. The active loudspeaker is available in white silk matt or black high-gloss lacquer as well as walnut real wood veneer with a perfect surface finish.

Experience film and music authentically

Our Townus Sub 12 subwoofer helps you experience your music and films in a new way: Not only hearing them, but also feeling them makes the listening experience really come alive and creates an authentic atmosphere. Thanks to its high-quality technical components, high amplifier power and the meticulous fine-tuning of our engineers, the Townus Sub 12 achieves this with effortless ease. It is also highly resilient and offers enormous dynamic reserves. By adding the Townus Sub 12, your favourite music gains in power and liveliness. When the Townus Sub 12 flexes its bass muscles in a controlled way, it will make your walls shake. Our SC technology protects the active subwoofer from damage and ensures the lowest possible distortion.

Thanks to its "room compensation circuit", which allows three-stage adjustment of the low-frequency reproduction, the Townus Sub 12 is particularly uncritical when it comes to positioning it in the room. This ensures that the bass reproduction of the Townus Sub 12 is always clear and precise.

Technology at its best

The Townus Sub 12 active subwoofer from Canton operates according to the bass reflex principle with a downfire passive cone. To guarantee precise mechanical performance, it is equipped with a lavishly dimensioned drive including the latest generation of wave surround technology. Compared to conventional surrounds, the multi-folded wave surround allows for a much longer excursion and reduces sound distortion. For maximum precision and correct impulse processing of the low frequency signals, the Townus Sub 12 uses a

CANTON

high-performance woofer chassis made of titanium and a rigid passive cone made of MDF. The Townus Sub 12 weighs 21 kilograms and has a powerful 380 watt power amplifier with high- and low-level inputs. Despite its living-room-friendly dimensions, it delivers a bravura low-frequency performance. Its automatic on/off function allows for convenient operation in everyday life, and thanks to the controllability of volume, phase and crossover frequency, the Townus Sub 12 harmonises with all stereo and home cinema speakers.

Design

The modern yet timelessly elegant Townus speaker series harmonises with many interior styles thanks to the different cabinet finishes available. Our Townus Sub 12 picks up on the design of the Townus series and offers the ideal complement to the elegant speaker models - both visually and acoustically. Immaculately crafted cabinets in white satin or high-gloss black lacquer, as well as the version in fine walnut real wood veneer, underline the premium claim of the Townus Sub 12 active subwoofer. The high-quality and acoustically neutral fabric cover in black adheres to the baffle by means of a magnet and, if necessary, conceals a direct view of the powerful 308 mm titanium chassis. The generously rounded "corners" of the cover give our Townus Sub 12 a modern and attractive look.

Type	Active subwoofer system
Engineering Principle	Bass reflex with passive membrane
Nenn- / Musikleistung	250 / 400 watts
Frequency response	20...200 Hz
Crossover frequency	50...200 Hz (adjustable)
Woofers	1 x 308 mm (12.1"), titanium (Wave surround) 1 x 308 mm (12.1"), passive
Connection	2 high level inputs (loudspeaker cable) 2 low level inputs (chinch)
Features	Automatic on/off switch adjustable volume Adjustable phase limiter Adjustable crossover frequency
Special Features	SC-technology Oval fabric grill
Warranty	5 Jahre
Dimensions (WxHxD)	36 x 47.5 x 50 cm (14.2" x 18.7" x 19.7")
Weight	21 kg
Power consumption	0,32 watts
Carton Content	Canton Townus Sub 12 Fabric grill Power chord Manual
